Komal Abbasi (#WD1-F-33555)

Khadija-Tul-Kubra (03477426853)

Batch code#1605

Instructor: Ma'am Sumbul Mohammad Saleem

Center name: Jinnah Homeopathic College

About Website

Introducing our collaborative effort, Komal and Khadija proudly present our innovative online shopping platform, "Modern Furnishings". We love design and making things practical, so we decided to focus on furniture for people who like to shop online. We used HTML to make sure the website is strong and organized, and we added CSS to make it look nice and stylish. "Modern Furnishings" is here to give you a fun and easy time while you explore our collection of modern furniture, specially designed to make your living spaces even better.

Why we use this name?

We picked the name "Modern Furnishings" because it perfectly captures what our website is all about. The word "Modern" reflects the contemporary and up-to-date design we offer, making sure our furniture suits the latest styles and trends. Meanwhile, "Furnishings" emphasizes that we're not just selling individual pieces; we're providing everything needed to make homes stylish and comfortable. Together, "Modern Furnishings" sums up our commitment to offering the latest, trendy, and functional furniture for modern living spaces.

From where we get an idea?

To get ideas for Modern Furnishings, we looked at cool home design websites. We also checked out social media like Instagram and Pinterest for inspiration. By putting all these ideas together, we aimed to make a website that's trendy and matches what people want.

Our ideas for designing:

When it came to designing Modern Furnishings, we wanted the website to feel modern and stylish, so we chose a clean and organized layout. For the color-picking part, we thought about what colors would give a contemporary and inviting vibe. After trying out a few combinations, we settled on two shades that worked well together. The main color brings a classy touch, setting the overall mood, while the second color adds a bit of excitement without being too flashy. This design and

color combination aims to make Modern Furnishings visually appealing and comfortable for everyone browsing for their perfect furniture pieces.

What we use in?

For creating our website, Modern Furnishing we used HTML and CSS to make everything work and look good. HTML helped us organize the website and create a strong structure. We used HTML tags like div, header, main, footer, nav, list, button and more tags. CSS was like our design magic – it allowed us to choose colors, add images, set backgrounds, adjust spacing with padding and margin, and pick the right font size for easy reading.

Our Instructor:

Ma'am Sumbul is an amazing teacher! She explains things in a way that's easy to understand, and I really appreciate that.I feel like I'm learning a lot about website development because of her. She's a great teacher, and I'm thankful for her guidance.

Class Overview:

Alhamdulliah we have completed our html and css journey.In our web development class, we covered a lot of interesting things! We started with the basics of HTML, like document structure, headings, and paragraphs. Then, we learned about links, lists, images, and forms. Ma'am Sumbul made sure we understood everything, even the newer HTML5 features. CSS was another exciting part of our learning journey. We got to play with colors, backgrounds, and spacing, and our miss showed us how to make our web pages look really cool. We also learned about layouts, flexbox, and grid systems for designing pages. Overall, it's been an awesome class where we explored everything from the basics to more advanced topics. I feel confident about creating websites now, thanks to what we learned here!

I want to express my heartfelt thanks to Banoqabil for giving us the fantastic opportunity to learn and grow through their platform. I am truly grateful for this opportunity to expand my knowledge and skills. Thank you, Banoqabil, for making education accessible and empowering us to reach our goals.
